Book Title: The Maze Runner

Rating 1-5 (1-lowest, 5-highest): 4.5/5

This fascinating book is set in a distant and post apocalyptic future. It narrates the lives of a group of young males that live trapped in a maze. They arrived there through a swaying elevator and they do not remember anything before that moment. Every month a new boy arrives into the maze with some supplies. The book is based on Thomas' point of view. He is curious and brave and since the beginning he shows that he is ready to find a way out.

I found this book interesting and full of plot twists and in fact you just want to discover what is about to happen. Throughout the book you get really attached to the characters especially Newt and Thomas, the two main characters. Newt is my favorite character because he is a very kind person, always ready to help his friends.

I would recommend this book especially to those people that have enjoyed other sagas such as *The Hunger Games* or *Divergent*. I feel that this book is very similar to these sagas but not everybody knows it. I do not understand the reason behind it because it is well written and even the movies are a very good representation of the books. It is a dystopian novel so you have to be prepared to be overwhelmed by the story, but for those who love this genre, they are certainly going to love *The Maze Runner*.
